KEY FINANCIALS – 9M 2022

Highlights 9M 2022

JOST increased sales by +23% to €961m in 9M 2022, with strong growth both in Transport (+19%) and Agriculture (+36%)

Adj. EBIT grew by +15% to €97m in 9M 2022 and adj. EBIT margin amounted to 10.1%

JOST benefited from global footprint: The strong development in North America and APA offset the weaker development in Europe.

Visibility improved during Q3 2022 as supply chain issues eased. Demand for trucks remains robust despite macro concerns.

Based on the positive development, JOST raised its guidance for sales and adj. EBIT for fiscal year 2022

Development of Sales and Earnings by Region

SALES SPLIT BY GEOGRAPHY (IN M€)

9M 2022 COMMENTARY

- JOST boosted sales by +23% in 9M 2022, compared to prior year
- North America grew strongest, supported by growing demand and market share gains. Markets in Europe remained robust on a high level. APA sales declined due to a weak Chinese truck market, but JOST's could partially offset this negative effect with higher sales in other countries in the APA region.

ADJUSTED EBIT SPLIT BY GEOGRAPHY¹(IN M€)

- Group adj. EBIT increased by +15% to €97m in 9M 2022, reaching a new record level for operating profits in nine months.
- Adj. EBIT margin was strong at 10.1%, despite the sharp cost increase for materials, energy and logistics, especially in Europe.
- High operational flexibility allowed JOST to cope with quickly shifting market demand across the different regions, limiting negative impact of rising costs.

ROCE, Equity Ratio and Leverage Development

BALANCE SHEET OVERVIEW AS OF SEPTEMBER 30, 2022

COMMENTARY

- ROCE increased to 17.0% compared to year-end 2021, mostly due to the increase of adj. EBIT compared to prior year.
- Equity ratio improved to 34.9% compared to year-end, driven by strong operating results and growing net income.
- Liquid assets grew to €99m as of September 30, 2022, compared to year-end (Dec. 31, 2021: €87m).
- Net debt expanded slightly to €205m, compared to year-end (Dec. 31, 2021: 194m). The main reason for the increase were dividend payments amounting to €16m during Q2 2022.
- Despite the slight increase in net debt, leverage improved to 1.38x due to the strong growth in adj. EBITDA during the last twelve months (Dec. 31, 2021: 1.45x).

¹ ROCE=LTM adj. EBIT / interest-bearing capital employed (interest-bearing capital = equity + financial liabilities [excl. refinancing costs] – liquid assets + provisions for pensions)

² Net debt = interest bearing capital [excl. refinancing costs] – liquid assets

³ Leverage = Net debt/LTM adj. EBITDA [LTM adj. EBITDA = € 148m; LTM adj. EBITDA PY = € 140m]

Cash Flow and Working Capital Development

CASH FLOW OVERVIEW

¹ Free cash flow = Operating cash flow – capex

² Cash conversion = Free cash flow/adj. Net Income

³ Capex = Payments to acquire property, plant and equipment + payments to acquire intangible assets

COMMENTARY

- The continuing surge in business volume as well as price increases, lead to a significant rise in working capital. Despite this, JOST was able to achieve a positive free cashflow of € +10.1m in 9M 2022.
- Capex spending increased to €21.2m in 9M 2022 and is at 2.2% of total sales below the 2.5% of sales expected for the year.
- Trade receivables and trade payables increased significantly compared to prior year, driven by the higher business activity. Price increases and growing demand also accelerated this development.
- Inventories rose significantly due to not only the increase in activity levels but also because of an increase in safety stock to bridge supply bottlenecks across the value chain.
- NWC as % of LTM sales increased to 21.2%, compared to 9M 2021, due to the higher working capital, but is expected to be below the 20% threshold by year-end as guided.

Development of JOST's Sales and Adjusted EBIT by Quarter

SALES (€m)

ADJ. EBIT (€m)
ADJ. EBIT MARGIN (in %)

JOST grew strongly in Q3 2022, benefiting from high demand in transport and agricultural products. Sales exceeded the €300m and adj. EBIT the €30m mark despite typical summer seasonality.
